

E4202-01

Dry screed system;

	Installation (from the bottom up)	Concrete ceiling - Improved Sound insulation and Heat insulation
A	Height dry screed	40 mm
B	Surface weight dry screed	approx. 10 kg/m ²
C	Bare ceiling	according to statics
D	Moisture barrier (lead up on the wall, overlap 30cm)	0,2 mm
E	Edge insulation strips to the upper edge of the finished flooring	10 mm
F	Wood fibre impact sound insulation or mineral fibre impact sound insulation SD50/CP2 (DES sg), s' < 10MN/m ³	22/20 mm
G	EGGER OSB Tongue and groove profile	18 mm
H	Flooring (except ceramics)	according to preference
I	Degree of impact sound improvement $\Delta L_{n,w}$	22 dB Test report of Pavatex GmbH
